

1706D Electric Power Engines

Power range 1800 rpm 294-354 kWm (engine gross power)

Emissions U.S. EPA Tier 3

The Perkins® 1700 Series is engineered to provide class leading performance and maximise competitive advantage for our customers.

Developed on a latest generation 9.3 litre core, the 1706 offers greater capability and more flexibility to our customers from a simple plug and play product.

Features and benefits

- A high power density product that combines dependable power and high efficiency coupled with proven core engine designs assures **maximum durability, reliability** and quiet operation.
- Designed to provide more flexibility to our customers and offer a simple plug and play product allowing for **easier installation**.
- With fuel consumption optimized to both prime power and continuous running applications and the requirement for no additional fluids or additives result in **lower cost of ownership**.
- Throughout the life of a Perkins engine, we provide access to genuine OE specification parts along with vee belts and 500-hour oil change intervals enabling **low-cost maintenance**.
- Perkins offer a range of flexible solutions to help provide appropriate support, either to the OEM's network or directly to the machine customer. Our information systems enable our distributors to quickly diagnose engine faults and identify the right parts supported by the Perkins logistics operation ability to dispatch more than 45,000 different parts from stock, reaching the customer within 24 hours helping to **maximise the productive life** of your engine.
- Perkins takes pride in manufacturing all products globally to the same **high quality standard**. All of our products are manufactured in world class facilities to ensure highest quality for your peace of mind.
